Collect, Process and Share Data

Powerful and Versatile Cloud Service

Industry-driven cloud solutions

dataTaker Live is built to help companies Collect, Monitor, Analyze, Store and Share information that improves connectivity and data acquisition of process instruments and industrial systems. Our solution increases operational productivity and efficiency.

- ◆ **Customised solution**
- ◆ **Easy Set up**
- ◆ **Data logging and monitoring from your PC, smart phone or tablet**
- ◆ **Affordable**
- ◆ **Service subscription allows unlimited users**

Monitor & Analyze

Real-time remote access to measurements from anywhere at any time and allowing configuration changes for dataTaker loggers from your computing devices.

Store & Share

Synchronize and save data to your personal cloud account. dataTaker Live dashboard lets you collaborate and share data.
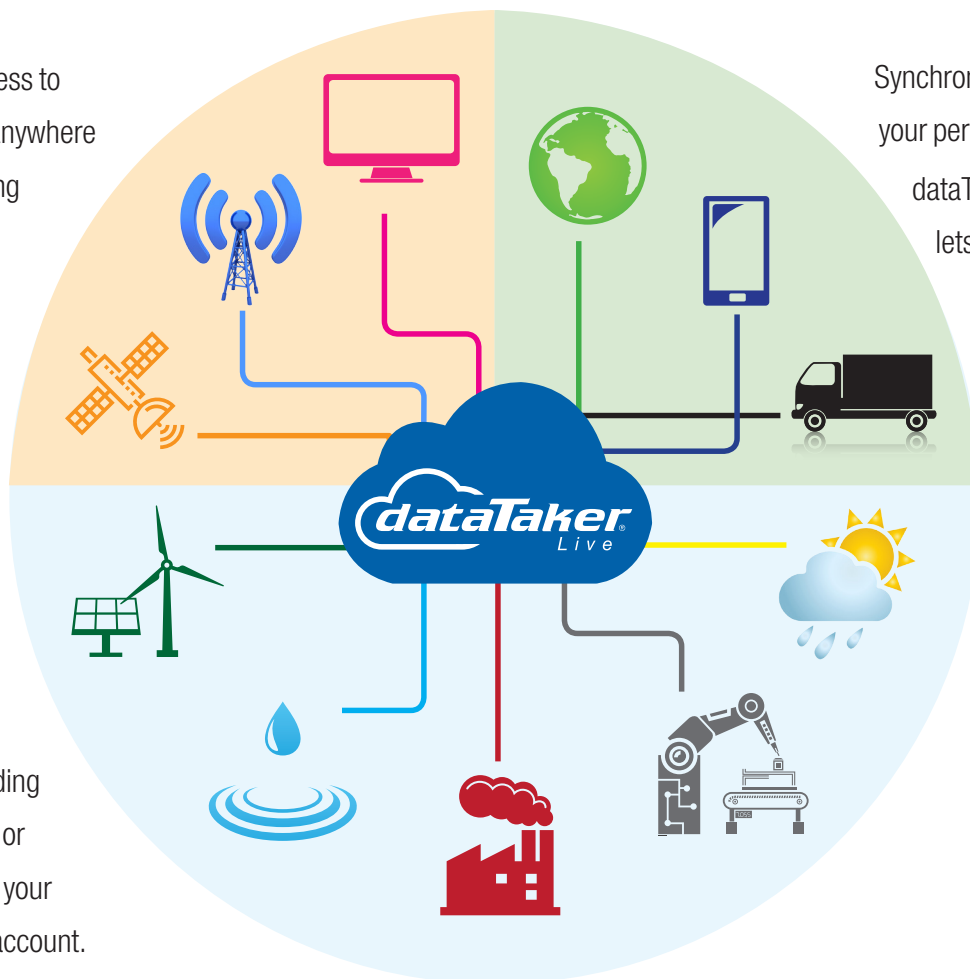

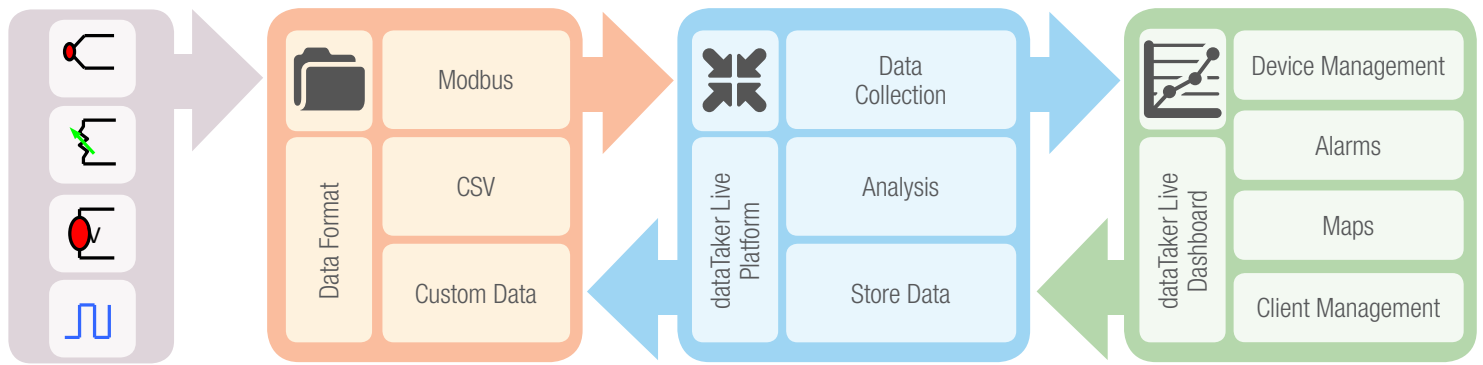

Collect

Automatic data uploading from sensors, loggers or Industrial gateways to your private cloud service account.

Data analysis with standard and custom scripts.

What is dataTaker Live?

dataTaker Live is a web-based intuitive graphical interface that allows customers to collect, process and share data across all platforms.
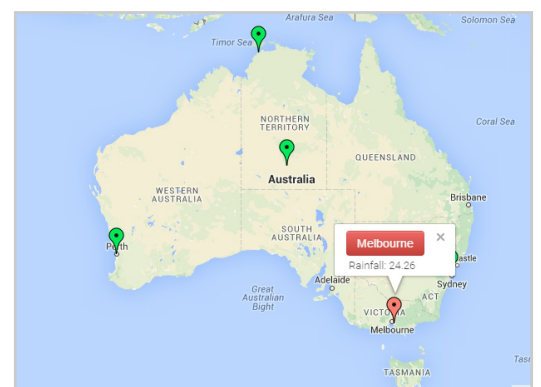

Why choose dataTaker Live?

Acquire data from Devices via Ethernet, Wireless LAN, cellular network or Satellite to the cloud server enabling data analysis and storage.

◆ **Customisable dashboard**

◆ **Unlimited number of users**

◆ **Real time and historical information**

◆ **Visualisation of locations**

◆ **Email & text alarm notifications**

◆ **Data analysis**

◆ **Configurable reports**

◆ **Asset management**

◆ **Alarms & notifications**

◆ **Access data 24/7 globally**

Real-time and historical data monitoring

dataTaker Live dashboard displays real-time sensor measurements, calculations and diagnostic information using custom dashboard.

Alarms Map

dataTaker Live raises alarms to alert users through the interface using colour coding when abnormal condition or problem is detected.
